

<http://www.grade.org.pe/> Here is one of the definitive studies by the conservative, GRADE NGO. (**Ver Castellano abajo**)

As the following chart indicates, all rural areas, where most of the poor reside, would lose income (Total between 99.6 to 158.2 million USD). The rural, Sierra highlanders where most of the extreme poverty is located would lose some 100.2 million USD.

The biggest winners would be the urban areas, especially metropolitan Lima where most of the wealthy Peruvians are located. Lima would gain from 186.7 to 351.3 million in gross income.

TLC Impacto en bienestar por región // FTA Impact on Peru by Regions

(US\$ millones)

Región	Cota inferior a/ (partial Tariff eliminated)	Cota superior b/ (full Tariff elimination)
Rural	-99.6	-158.2
Costa Coast	-8.4	-13.0
Sierra Highlands	-63.4	-100.2
Selva Amazon	-27.9	-45.0
Urbano	314.9	575.1
Costa	63.9	112.2
Sierra	45.7	80.5
Selva	18.6	31.1
Lima Metropolitana	186.7	351.3
Nacional	215.3	416.9

a/ Escenario: Reducción de tarifas al primer año de implementación del TLC, de acuerdo con el segundo calendario de desgravación presentado en la negociación. **Tariff reduction during the first year.**

b/ Escenario: Eliminación de todas las tarifas de importación de productos de EE. UU. **Tariff reduction when fully implemented.**
